

Part-B

Q#1 Flowchart:

Pseudocode 3 (3)

Date: . . .

```
1. Start
2. input N
3. For i ← 1 to N
    input marks [1:5]
    Sum ← 0
    low marks ← 100
    For j ← 1 to 5 do
        input marks [j]
        Sum = Sum + marks [j]
        if marks [j] < 33 then
            low marks ← 0
    End For
    avg = Sum / N
    if low marks = 0 then
        result = "Fail"
    Else if avg ≥ 80 then
        result = "distinction"
    Else if avg ≥ 60 then
        result = "Pass"
    Else
        result = "Fail"
    Print result
End for
End
```

PAC - Chart (3)

Date: _____

Input Program	Description Control the loop for N students and calls sub modules	Output • Read N • Call Process student
Input marks	Reads and validate 5 subject marks	• Input marks • Check range • Return if invalid
Output	Sum average and determine result	• check mark < 33 • Cal avg • Result

I/O - chart :

Input	Process	Output
• N	1. Each student	• Distinction
• 5 subject marks	- Read 5 marks - mark < 33 - Cal: sum and avg - determine result	• Pass • Fail • Fail
